

[EN] 05. Technical Requirements for the dLibra System

The list below contains the software which must be installed and started up in order to install/update and start up particular modules of the system:

1. dLibra – server:
 - a. A virtual Java (JDK) machine of the Oracle company, version 1.8.
 - b. A relational Oracle database, version 9.2.x or higher, or PostgreSQL, version 8.x, or MySQL 5.5.x.
2. dLibra – reader:
 - a. A virtual Java (JDK) machine of the Oracle company, version 1.8.
 - b. An application server Tomcat, version 7. The server must be configured correctly with respect to HTTP and HTTPS protocols. Also, the necessary SSL certificates must be installed correctly.
3. dLibra – editor:
 - a. A virtual Java (JRE) machine of the Oracle company, version 1.8 or higher.
