

[EN] 07. Adding Content to a Planned Object

In order to add content to a planned object:

1. Select the planned object to which content is to be added from the element list.
2. From the context menu, select the "Add content..." option.
3. The creator for adding files to a planned object has four steps. In the first step, the user should indicate the object files, just like in the [first step of the new object creator](#).
4. In the second step, the user can enter additional information to be displayed on the web page and select the thumbnail – see the [fifth step of the new object creator](#).
5. The third step is the same as the [sixth step of the new object creator](#) – it makes it possible to enter administrative notes and decide whether the new edition is to be published.
6. In the last step (see the [image below](#)), the content of the object can be sent to the server. In order to send the files selected in the first step, the user should click the "Start" button. The progress of the sending process is shown with the use of progress bars.

The screenshot shows a software window titled "Kreator dodawania plików do obiektu zaplanowanego" (Creator for adding files to a planned object). The window has a standard Windows-style title bar with a close button (X) in the top right corner. Below the title bar is a menu bar with "Pomoc" (Help). The main area is divided into two panes. The left pane, titled "Kroki kreatora" (Creator steps), contains a list of four steps: 1. Wybierz plik główny obiektu (Select the main object file), 2. Miniatura dla wersji obiektu (Thumbnail for the object version), 3. Podaj informacje ogólne o obiekcie (Provide general information about the object), and 4. Przesłanie plików obiektu do serwera dLibra (Sending object files to the dLibra server). The fourth step is currently selected and highlighted. The right pane, titled "Przesyłanie plików obiektu" (Sending object files), displays a progress bar. Above the progress bar, it says "Postęp" (Progress) and lists four steps: 1. Tworzenie wersji plików (0:00) (Creating file versions), 2. Przesyłanie plików na serwer (0:00) (Sending files to the server), 3. Tworzenie wersji obiektu (0:00) (Creating object version), and 4. Tworzenie struktury obiektu (0:00) (Creating object structure). Below this, it says "Aby rozpocząć przesyłanie wciśnij przycisk 'Start'" (To start sending, press the 'Start' button). The progress bar itself shows 0% completion. At the bottom right of the right pane is a "Start" button. At the bottom of the window is a footer bar with several buttons: "Pomoc" (Help), "<< Wstecz" (Back), "Dalej >>" (Next), "Zakończ" (Finish), and "Anuluj" (Cancel).
